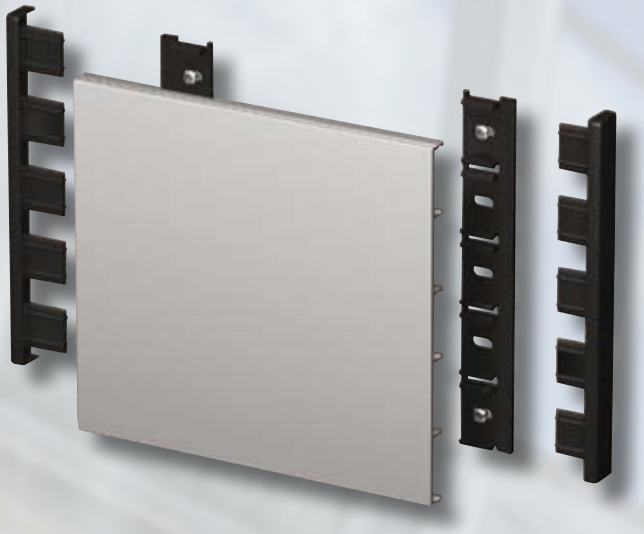
Way Finding Solutions

Features

Triline® DeSign is a complete new line for interior and exterior signage in a straight design, selected to be the trend for the coming decades.
The DeSign product line excels through it's elegant simplicity. It is classic in approach but extremely multifunctional, thus being suitable for applications in merely every architectural context.



- An everlasting concept with straight panels
- System for installation with clips
- Wall Signs
- Transverse Signs
- Suspension Signs
- Antivandalism and anti-theft end caps features
- Modular with inexhaustible combinations
- Synthetic end caps
- Aluminium side-track system available in three shapes (Classic, Radius, Triangle)
- 9 standard heights in face profiles
- 6 standard heights in insert profiles for material thickness up to 1,75 mm
- 2 variable insert profiles adaptable to any size
- Simple aluminium system complying with architectural expectations and safety regulations

Triline®

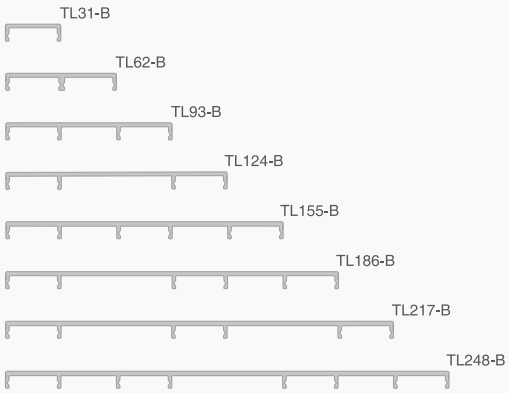
VALUE
VISUAL ALUMINIUM EXCELLENCE

	page
Aluminium profiles & Synthetic parts	1.2
Door signs	1.4
Wall signs	1.16
Flag signs	1.18
Suspended signs	1.20
Directory signs	1.22
Desk stands	1.26
Din measures	1.28
Emergency signs	1.30

Face profiles

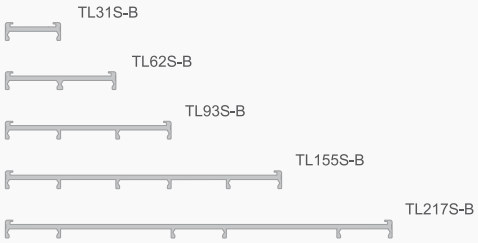
The face profiles have a material thickness from 1.5mm / 0.06” up to 3mm / 0.12”, allowing engraving and Braille applications.



Article code	width frame	Insert measures
TL31-B	31mm / 1.22”	-
TL31S-B	31mm / 1.22”	23mm / 1.02”
TL62-B	62mm / 2.44”	-
TL62S-B	62mm / 2.44”	57mm / 2.24”
TL93-B	93mm / 3.66”	-
TL93S-B	93mm / 3.66”	88mm / 3.46”
TL124-B	124mm / 4.88”	-
TL155-B	155mm / 6.1”	-
TL155S-B	155mm / 6.1”	149,4mm / 5.88”
TL186-B	186mm / 7.3”	-
TL217-B	217mm / 8.54”	-
TL217S-B	217mm / 8.54”	212mm / 8.35”
TL248-B	248mm / 9.76”	-

Insert profiles

The insert profiles offer the possibility to insert any kind of material with a thickness up to 1.75mm / 0.069”.

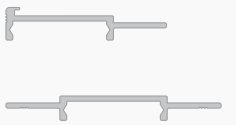


Decipher the Triline® code

Face and insert profiles	Single and double end caps
TL = Triline®	TL = Triline®
31 = 31mm width profile	E = Single end cap D = Double end cap
S = insert profile	93 = 93mm length end cap
-B = mill finish -S = silver anodised -G = gold anodised	-B = black -G = grey

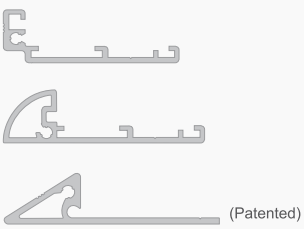
Panel & supporting profile

These variable insert profiles offer the possibility to create any type and measure of insert panels larger than A4 (for example A3, A2, A1), and to integrate for example maps in large directories.



Side track profiles

Side track profiles can be used in any application, both in small door signs and in larger directories.



Top & bottom profiles

Top & bottom profiles are only used in combination with side track profiles.

TLCLAT with TLEKC side tracks
TLRAD with TLEKR side tracks

Intermediate profile

Intermediate profiles are only to be used in combination with side track profiles:

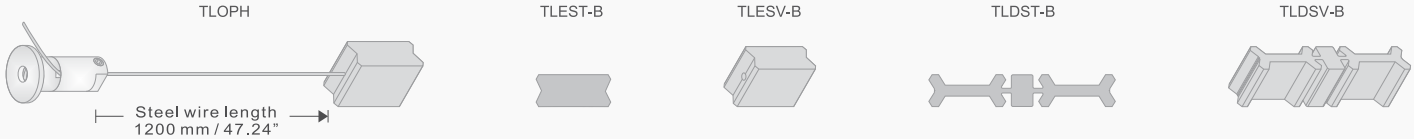
-TLEKC
-TLEKR

Support profile

We recommend to install this invisible support profile (vertical), when the individual horizontal profiles are longer than 80cm / 3.15”.

Suspension system

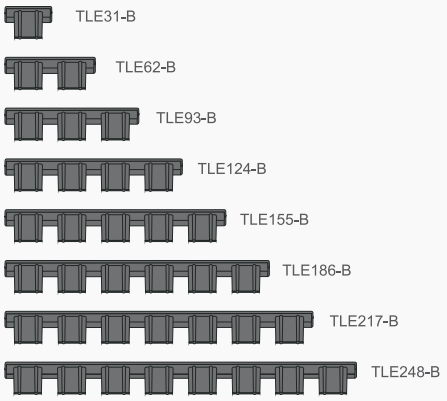
The connecting parts of the suspension system TLOPH are made of aluminium in order to guarantee safety in case of fire, and to perform easy and smooth maintenance and / or replacement of suspension signs. The steelwire of 1.5mm/0.06” thickness has a portable force of 160kg/350 pounds (tested). The face profiles will remain hanging from the connectors (TLEST/TLDST) thanks to the seemingless fitting of the profile to the connecting piece.



Single end caps

Anti-vandalism end caps (patented) for wall fixation. To be used in combination with the TLCLJ clips.

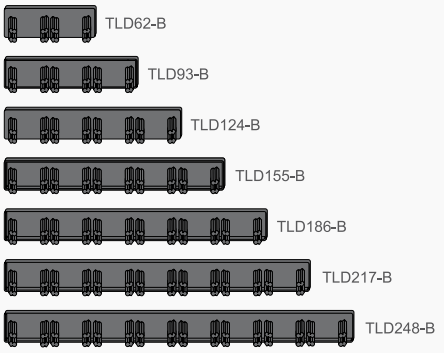
The synthetic end caps are made of polyprop and glass fibred , this combination guarantees an extensive flexibility, without breaking.



Double end caps

End caps for mounting of double-sided profiles (transverse fixation (flags), and suspended systems).

The synthetic end caps are made of polyprop and glass fibred , this combination guarantees an extensive flexibility, without breaking.



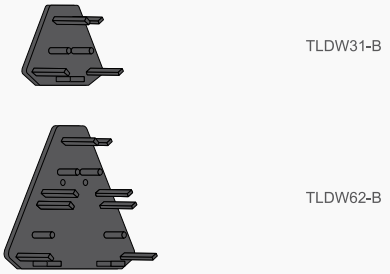
Desk stand end caps

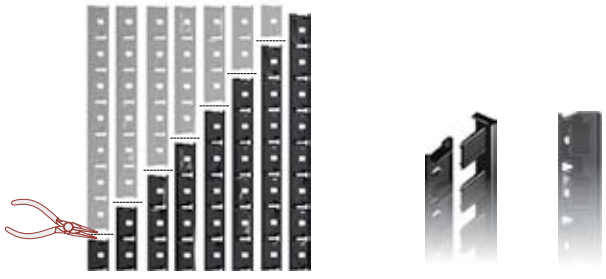
Available in two measures:

TLDW31: for profiles (front and back) with a height of 31mm / 1.22”

TLDW62: for profiles (front and /or back) with a height of 62mm / 2.44” or two 31mm / 1.22”

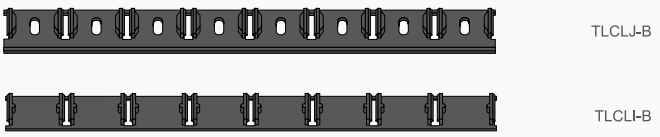
The assembling of the desk stands is always in combination with the TLDBW blocking pin.





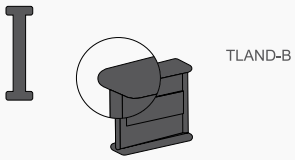
Clips

TLCLJ is a patented clip to be used in combination with single synthetic end caps and the TLJAZ2 side track.
TLCLI is used in combination with TLEKC and TLEKR side tracks, intermediate profiles and support profiles.
These clips guarantee an extensive flexibility, without breaking.



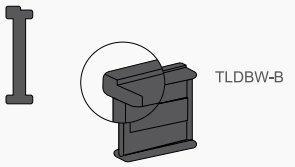
Blocking pin / side tracks

TLAND is a patented anti-theft blocking pin for securing all types of wall mounted signs assembled with side tracks.



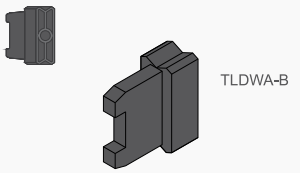
Blocking pin / desk stands

TLDBW is a patented blocking pin, necessary for blocking the profiles in the end caps for desk stands.



Blocking pin / double end cap

TLDWA is a patented blocking pin to guarantee the blocking of the aluminium profiles into the double end caps for the transverse and the suspension signs.



Screw

TLSCR3 is used to lock the side track caps or classic frame corners and to ensure the correct blocking of the TLCLI/TLCLJ clips in the side

Side track caps

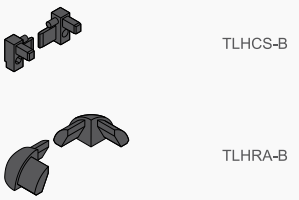
Side track caps are only used in combination with side track profiles.

TLCLAS with TLEKC
TLRADS with TLEKR
TLJAZS with TLJAZ2

Frame corners

These are only used in combination with side track profiles and top & bottom profiles

TLHCS with TLEKC, TLCLAT
TLHRA with TLEKR, TLRAD



Triline key

TLKEY is created to unlock the profiles from their clips and replace a profile in a directory without disassembling the signs.

The key has a stainless steel insert piece with a synthetic handle.

Assembling

The aluminum profiles (face and/or insert) will be snapped on the clips
and finished with synthetic **anti-vandalism end caps** (from 31mm to 248mm).
Easy assembly.
Ideal for personnel signs, room identification, wall projection signs, emergency signage and more.

APPLICATIONS

Triline® profiles

Vinyl lettering
Digital printing
Engraving

Note:	These extra profiles can be used to extend the door or wall sign examples showed on the previous pages.
For example:	You need a wall sign of 420mm length in a classic frame, but instead of 2x62mm profiles you want a wall sign with 4x62mm profiles.
Your order:	1x (Wc203 + (Ex127 x2)) = A wall sign with one top profile of 124mm and four 62mm profiles in a classic frame with a length of 420mm
